

Hand Press

The hand press is a device that easily collects samples from a large area FPCB board.

This equipment is applicable to products with FPCB Board Size 500 * 500 or less. Also, the thickness of the board that can be cut is 0.1 ~ 0.5t or less. If the board thickness is over 0.5t, the mold can easily break down.

- Product size : 180x400x400(mm)
- Guide Size : 500x400x110(mm)
- Mold size : 10x20(mm)
- Weight : Approximately 25kg
- Usage standard : 0.1~0.5t under(Compliance with specifications)
- Working distance : Working Size 500mm
- Used mainly for FPCB specimen collection
- Failure to comply with the above standards may affect mold wear and equipment damage.
