

## Sample Router

Sample Router is a router-like device for cutting samples from panel-type PCB boards.

Can cut the desired area with simple operation.

In the case of Sample Router, a dust collector is installed so that the cutting sludge is sucked when cutting.

The spindle motor was used to minimize noise during cutting.

DIVISION	UNIT	SPECIFICATION
DRILLING CAPACITY	mm	Ø1.5mm
MAIN SPINDLE TRAVEL	mm	30mm
SPINDLE SPEED	rpm	0 ~ 12000 rpm
MAIN SPINDLE TAPER		JACOBS No.1
Power		AC 220V, 50~60HZ, 1.9kw
DIMENSIONS (가로 * 세로 * 높이)	mm	500 * 600 * 1250
WEIGHT	kg	40
