

## Punching machine

The punching machine is a Manual equipment for cutting Rpcb Board.

The equipment cutting size is 300\*160, which is mainly used for cutting small boards.

The cutting thickness is 0.5 ~ 1.6t, making it possible to cut thicker boards compared to hand presses.

- Product size : 450x300x700(mm)
- Guide Size : 400x300x130(mm)
- Mold size : Basic size 10x20(mm) - Other size options
- Weight : Approximately 40kg
- Usage standard : 0.5~1.6t under(Compliance with specifications)
- Working distance : Working Size 160mm
- Used mainly for RPCB specimen collection
- Failure to comply with the above standards may affect mold wear and equipment damage.
