

Metallographic Microscope YB-300M

YB-300M is power and flexibility to perform multiple inspections with outstanding efficiency.

- Logical layout for superior operation.
- Greater system flexibility with unprecedented freedom to select and combine components.
- Excellent image clarity and superb resolution for all inspection demands.

Specifications

- Observation Modes : B/F, Polarizer.
- Illumination : 12V / 50W Halogen Lamp
- Objectives : 5X, 10X, 20X, 50X, 100X (Option)
- Stage : Standard Type 160 x 250mm
- Working distance : 38mm
- Coarse adjustment accuracy : 0.2mm
- Fine adjustment accuracy : 0.002mm
- Dimensions : 320 x 700 x 435(mm)
